

Obedying the commands of Jesus is the Key 2 Changes in people's lives.

Vision of Disciple Making in the United States – December 2016

The Lord gave me a **Vision** of a blank map of the United States, which had no State borders, and then I saw the Hand of the Lord mark out the State of Colorado, out of all of the other States, with his Finger, and when He completed the borders of Colorado, I saw two individuals, larger than life, walking from the South-West corner of the State, up to the North-Eastern corner of the State, in 5-to-8 Steps, which once they got to the other side of the State, the entire State of Colorado lit up and became the light to the entire United States, branching out tent pegs out to cities all over the United States that lit up each place it was established. The Lord then showed me this same Vision in the Country of India, where the Epicenter started in the State of Orisha.

The Interpretation came that Colorado was going to be the Epicenter of Discipleship to the United States, and that these two individuals were actually two groups that had partnered up together to cover the state of Colorado with the message and training of Discipleship, taking them 5-to-8 years, which was about the number of steps it took both individuals to reach the other side of the State, and once trained and equipped, these tent pegs (individuals) would begin to send out Disciple Makers throughout our Nation to begin to Wake up the Sleeping Church of the United States, and empower them to become relevant again, Refreshing and Healing, and no longer Spiritually Sick, “Lukewarm”, effective again at our Single Great Commission, **Making Disciples**, not Converts, not Church Planters, not Church Growth experts, but the Light of the World again, as we were called and modeled by Jesus to be. That same vision was shown to me in the Country of India, starting in Orissa, India too.

Vision of Futuristic Foundation and Structure of the Church of the United States – January 2018

The Lord gave me a **Vision** of all of the Christian churches in Colorado Springs and the surrounding communities no longer on their foundations, and maybe better described as only having their foundations, with no building present, while at the same time each church foundation having a building crane over each of the foundations.

The Interpretation came that the foundation of the Christian Church, not just in Colorado Springs, but symbolically the Church throughout the entire United States was going to change dramatically. No longer were they going to be known for their building structures and foundations, but that God was going to take them deeper into being known for their Spiritual Foundation and Structure of people and not buildings. Though the building cranes appeared to be for physical use, God was showing that this was a different foundation and building that will not be seen physically, but Spiritually, real fruit and a lot of it. God is not only going to bring the Church back to its original roots, but equally important, God is going to use it strategically in these Last Days, for His End Times Fulfillment, desiring that none shall perish.
